

# 1060nm Broadband High Power Polarization-maintaining Isolator ( ± 30nm )

## Features

Low insertion loss  
High return loss  
High isolation

## Application

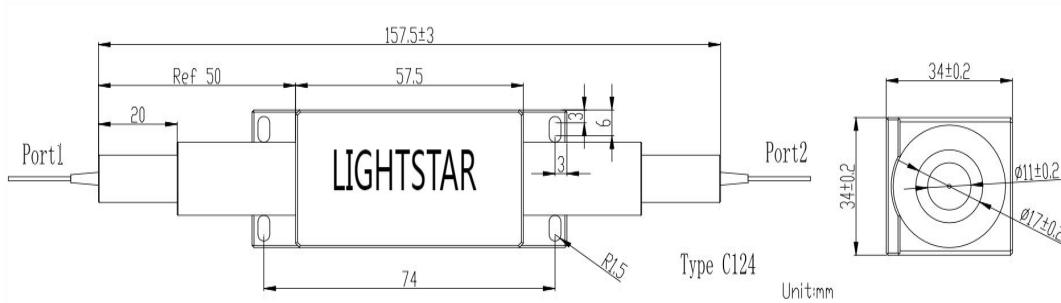

Ultra fast fiber laser  
Optical fiber amplifier  
Fiber laser

## Specifications

| Parameter                               | Unit | Value                              |                      |
|---|------|------------------------------------|----------------------|
| Central wavelength( $\lambda_c$ )       | nm   | 1060                               |                      |
| Operating wavelength range              | nm   | $\pm 30$                           |                      |
| Typ isolation                           | dB   | 30~35                              |                      |
| Isolation 23°C                          | dB   | 26                                 |                      |
| Typical insertion loss23°C, $\lambda_c$ | dB   | 1.0                                |                      |
| Maximum insertion loss23°C              | dB   | 1.3                                |                      |
| Minimum return loss(Input1/Input2)      | dB   | 50/50                              |                      |
| Extinction ratio                        | dB   | 20 (only for B Type)               | 22 (only for F Type) |
| Maximum power(CW)                       | W    | 1, 5, 10, 20 or specify            |                      |
| Maximum tensile load                    | N    | 5                                  |                      |
| Fiber type                              | -    | PM 980 Panda fiber or PM LMA Fiber |                      |
| Operating temperature                   | °C   | -5 to +50                          |                      |
| Storage temperature                     | °C   | -20 to +75                         |                      |

When using the Connector, the processing power is only 1W, the Insertion loss is 0.3dB higher, the return loss is 5dB lower, and the extinction ratio is 2dB lower. The Connector key is aligned with the slow axis.
